SAVE COSTS, SAVE TIME. DO MORE WITH SOLIS.

Solis Home Energy Solutions offers grid-tied and off-grid PV string inverters with free SolisCloud monitoring. Our UL 3741 Listed systems, known for quality and flexibility, feature string-level isolation technology. This enables our residential solutions to meet safety requirements with fewer components.

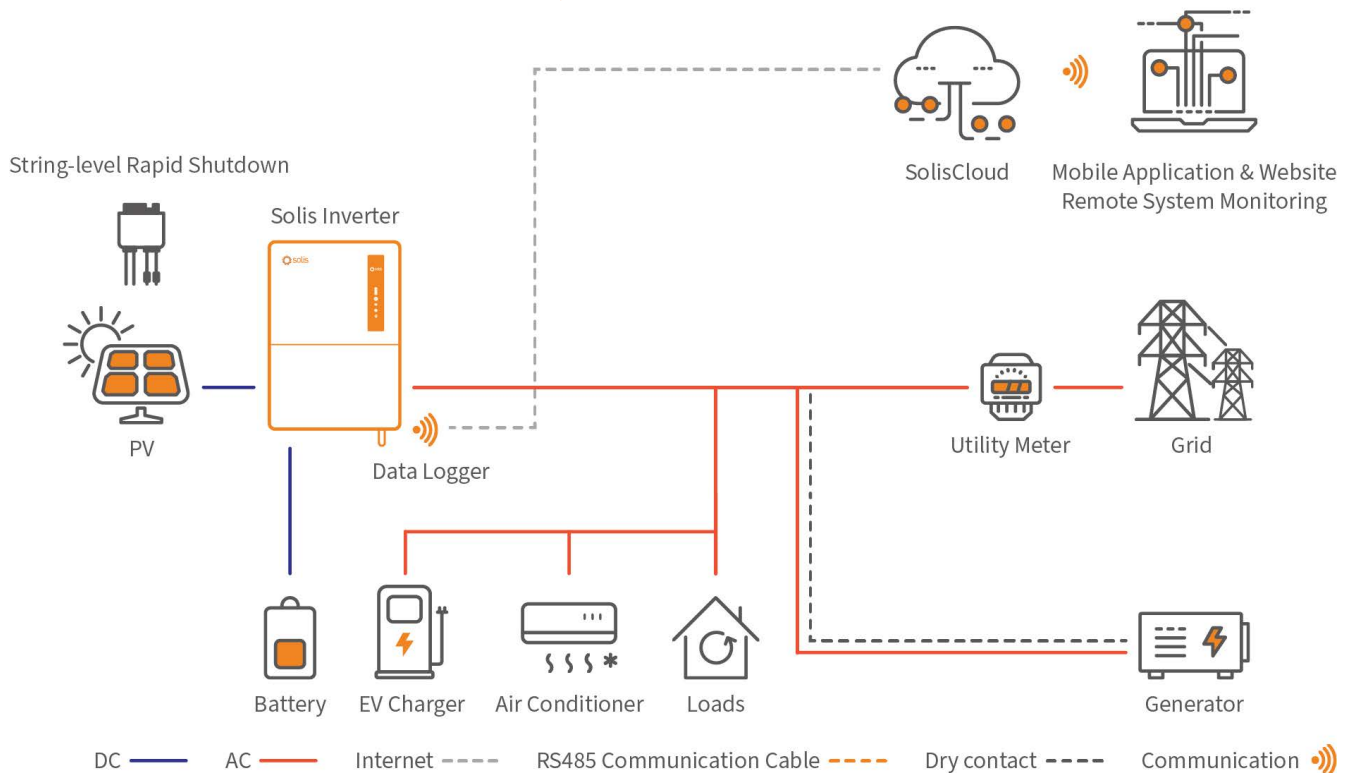

String-level Rapid Shutdown makes residential systems more cost-effective, faster to install, and simpler. As a result, you can serve more customers efficiently, helping them achieve resiliency goals quicker.

Implementing the UL 3741 Solution

For implementing the UL 3741 solution, listed Solis residential models, racking products and string-isolation devices must be deployed. Please refer to our compatibility documentation as well as consult with your distribution partner or Solis representative when ordering. Always consult manufacturers' addendums and installation manuals for full guidance on compliance.

Example UL 3741 Residential Energy Storage Solution
